CHEEKTOWAGA LIBRARY BOARD

RE: Cheektowaga Public Library
South Branch

Due to unforeseen site conditions it is necessary to perform extra foundation work at the South Branch Library so as to avoid the possibility of future settlement of the building.

Soil test boring taken August 20, 1964, indicated soil of fair bearing capacity. At this time there were no indications of subsurface water so we proceeded to design the footings using calculations of 3,000 # per foot.

Excavation work was started April 12, 1965. In the first area excavated the ground appeared fairly good and there was no indication of subsurface

4

Item No. 12 Cont'd

water. As excavation work proceeded subsurface water was encountered and the bearing quality of the soil began to look unstable. On May 13th, we ordered work to be stopped. At this time we authorized the Empire Soils Investigations Company to make a study and give us an analysis of the foundation conditions. After further boring and a thorough study of the soil was made they advised us to extend caissons to firm soil and ruled out the possibility of widening the footings. Their feeling was that the subsurface water condition, the level of which would vary throughout the year would vary in bearing capacity to such a degree that settlement would result unless the foundations were carried down to firm soil.

On June 24, 1965 Arrigo & Cartonia, Inc. submitted an estimate in the amount of \$14,316.00 to perform the necessary work. At a meeting with Mr. Arrigo and Mr. Cartonia held at our office the foregoing estimate was reduced to \$12,739.00. It is our hope that the work can be accomplished for less than \$12,739.00, for this reason we would like approval of the following resolution.

For a sum not to exceed the amount of \$12,739.00 Arrigo & Cartonia, Inc. Contractors for the General Construction Work for the Cheektowaga South Branch Library will perform the necessary work to install caissons under the foundation walls, same to extend to firm soil. All to be as per drawings and details prepared by the Architect.

Empire Soil Investigations, Inc.	\$ 495.60
Special Engineering Service	\$ 220.00

NOTE:

Balance Remaining	\$35,252.00

RE: Expansion of Sewage Treatment
Plant No. 5 - Stage I
Town of Cheektowaga, New York

Mr. Daniel C. Weber, Supervisor
Cheektowaga Town Hall
Broadway and Union Road
Cheektowaga, New York 14225

Dear Sir:

Enclosed is a copy of a letter sent us by the Hendrich Construction, Inc.

We recommend proposition No. 2, the 10 gauge type 304 stainless steel. We do not recommend the sandblasting but the \$120.00 should be used to patch the small holes in the gas dome.

This work became apparent when the surface was cleaned for painting.

We would like your approval to proceed with a change order.

Very truly yours,

NUSSBAUMER, CLARKE & VELZY

/s/ Charles F. O'Donnell

RE: Stage I Expansion
Cheektowaga Sewage Treatment Plant No. 5

Gentlemen:

This is in reply to your verbal request for a price to furnish and weld a steel liner plate to the existing 6' dia. gas dome of the Carter cover.

Proposition No. 1 - 1/4" wrought iron plate	- \$1,050.00
Proposition No. 2 - 10 ga. type 304 stainless steel	- \$1,295.00
Proposition No. 3 - 1/4" Corten Plate	- \$ 930.00

The above prices include sandblasting of the existing surface in contact with the new plate, welding top, bottom and seams, and Inertol paint. (1 coat on the concealed face and 3 coats on the exposed face).

Should you wish to omit the sandblasting, deduct the sum of \$120.00 from each of the above propositions.

The estimated service life of the 1/4" wrought iron plate, and the 1/4" Corten is 15 years. The stainless steel would last indefinitely.

We do not include any additional work on the existing gas dome cover.

Your early decision will be appreciated.

Very truly yours,
