Item No. 45 Communication from Dr. Victor Reinstein to Edward Rath, County Executive re: 20 District Reapportionment Hearing. Received and Filed.

20 DISTRICT REAPPORTIONMENT HEARING

August 30, 1966

Hon. Edward Rath, County Executive

Originally I did not intend to participate in this hearing. I Had intended to save my remarks for the public at referendum time. However, out of respect for some of your excellent department heads, who are of the highest caliber, and whose services I would hate to see the county lose, I decided to talk tonight. I want to acquaint you with what some of your other department personnel were trying to do to Erie County, in proposing this "20 District Plan".

I will bring up only a few points, and you can cut me off whenever you wish. There is plenty of time and opportunity to bring my information before the public, before the referendum, this fall.

(1) When the "20 District Plan" first came out, I publically called it the "anti-town plan". On further study I could change that title to "Anti-town, Anti-Democrat, and Anti-Cheektowaga, plan.

I will start with the "Anti-Cheektowaga" feature. With 101,022 inhabitants, we are the 2nd. largest town in Erie County, and at the 1970 census will probably be the largest town. Add to this 101,000 population the 7000 people from the Depew part of Lancaster which have been added to District #4 (of the 20 District plan) and you have a total of 108,000. This total fits the exact specifications for two of your county legislative districts. The south half of this total area, which is heavily Democratic, could be expected to elect Democratic county legislators. With good candidates, the north half could be expected to choose Republican county legislators. At the present time you have a Republican Supervisor elected on a townwide basis. But your braintrusters indicate that they do not like Cheektowaga. Under the "20 District Plan" they cut the Republican-dominated north end of the town into 3 pieces, under the domination of the towns of Amherst and Clarence. The 53,723 residents of the Republican north half are divided as follows: in the northwest section, 14,612 Cheektowagans are added to 21,146 from Buffalo and 18,264 from Amherst to create District #14, with a total of 54,022. With Cheektowaga making about only a quarter of the total, they are out

Item No. 45 cont'd.

In the northeast section of the town, 6053 from Cheektowaga are combined with 17,074 from Clarence and 30,322 from Amherst to make District #16. Cheektowaga makes only about one-ninth, so again they are to be outvoted. That leaves us with the north-central area of the town where 33,058 from Cheektowaga are combined with 20,352 from Amherst, to make District #15, with a total of 53,410. On the surface it looks as though this would be a Cheektowaga controlled district. But in this district one finds 13,634 registered Republicans, as against 9,740 Democrats. With this district definitely Republican controlled, the faction controlling the Republicans would Control the district. On this angle there are 7660 registered Republicans in Amherst as against 5974 in Cheektowaga. So what appears to be a Cheektowaga controlled district is actually under Amherst. An example of how this district might function - take this. The party machine, out of charity, might propose a Cheektowaga candidate. Any independent Amherst candidate could easily defeat the Cheektowagan in a primary fight.

As a result of this redistricting plan, Cheektowaga can be sure of a 2 minority party legislators, but none from the majority party. If this is a retaliation or purge for Cheektowaga's part in defeating the endorsed machine candidate for Congress, then it is carrying the idea too far. These district boundaries will last a long time.

(2) For the second point, I would like to take up the "four year term" part of the plan. The Chairman of your Reapportionment Committee said it would reduce a candidate's campaign expenses. That is correct. But it would also reduce the public's control over the elected official. Which is most important? In the west they use the recall provision, whereas in the east the only practical control is a short term of office, with re-election every two years. As an example, Republican Dr. Tillou could have stayed in office as long as he wished without any campaigning. Democrat Stanley Keysa, who has been a Democrat in a Republican town, has been Supervisor for nearly 20 years.

Coming from a historically-minded family, I checked Cheektowaga's Supervisors for the last 100 years. I find that two held office for 16 years, two for 14 years, one for 13 years, two for six years, and there were only two who served for less than six years. From a practical angle the short term is no deterrent to the man who does a good job. A short term increases contact between the public and the candidate, besides decreasing political machine domination.

(3) For the third point, I would like to talk about the system of divorcing town supervisors from the county legislative body. For 140 years the towns and the county were closely related. No one will deny that over these many years, we had good government at the county level. With a large board of 54 members, it was a government of dedicated men instead of that of a political machine. As the saying goes, "No government is better than the men who run it."

The "one man, one vote" court decision had no relation to the inter-related county-town relationship. It appears that some disgruntled county official was jealous of the size, strength, and power of town governments in New York State. It is a fact that single section meetings of the Association of Towns of New York State are as large as the entire County Officers meetings. In fact Buffalo does not have enough hotel accommodations to take care of the Association of Town's convention.

As quality of government should be the chief objective, the primary education of most good county officials results usually from years of experience in town government. Without the experience in this town government, it takes years longer for a person to find out the intricate workings of county government. Another point of this is that the relationship of most governmental functions is so intermingled between the county and the towns, that it is nearly impossible to do a good job on the one side without completely understanding the operations of the other side. The relationships of the towns to county government will diminish to that situation now existing between the county and village governments.

This provision for four year terms in the 20 District Plan was never discussed nor acted upon in the Reapportionment Committee hearings. It seems to be the brainchild of those who drew up the plan without any participation from the committee members as a whole.

Item No. 45 Cont'd

Even 30 years ago there were selfish groups endeavoring to take over the government unit functions for the county. I remember when the late Judge Kenefick, at the end of one of the hearings, stated, "If they were given control, they would create a Frankenstein that would be so powerful that it would be impossible to control it".

(4) My fourth point is actually the most important question. It is the question to be decided in connection with this reorganization of local government. Do the people of Erie County want to be governed by large or small units of government? That is, do people want to be governed by a Board of County Legislators or be governed through their local Town Boards? If you call it county government or metropolitan government, it makes no difference as far as the 20 District Plan is concerned. With a huge government, you of necessity have machine control, so in this reapportionment quarrel the issue becomes one of machine vs men. In repeating the saying "No government is better than the men who run it", it develops that no political machine-controlled body is better than the man who operates the machine.

Over the years, I have seen the old Kenefick "law" still hold; ie., "as governmental body increases in size, it becomes more expensive on both a per capita basis and property valuation basis." This rule works just opposite to private commerce and industry. A study of the 1960 U.S. Census report showed that 89% of the growth of New York State between 1950 and 1960 occurred in the towns or small units of government. We cannot deny that the prosperity and growth of a region depends on the industrial climate. It is in the towns that we find the most favorable industrial climate.

If we look at the situation from a different angle, we find that between 1960 and 1966, Buffalo lost population, and the county as a whole was practically dormant. Growth only occurred in the towns. By establishing uniformity throughout Erie County, we will no longer have regions of favorable industrial climate. Without industry, people cannot make a living. The result will be a decrease in population for the Niagara Frontier with the accompanying side effects. Today one can buy good industrial sites cheaper per acre in Buffalo than in Cheektowaga or Tonawanda. When big business organizations like F.N. Burt, J.W. Clement, or Loblaws moved from Buffalo to Cheektowaga, it wasn't because they could not find sites in Buffalo. Don't kill the goose that is laying the golden eggs!

Seriously consider all aspects of a healthy prosperous Erie County, Look to the county's future as well as just at its present.

TOWN ENGINEER - CHESTER L. BAYNE

Item No. 46 Remarks made by Kenneth W. Kitzinger, Town Attorney of the Town of Cheektowaga at a hearing held by County Executive Edward A. Rath on August 30, 1966.

I have not come here tonight to find fault with those who prepared Local Law Intro No. 6. I have come to request its veto by County Executive Rath.

This law was most certainly conceived in political iniquity by local Republican leaders. Their dedication to party cannot be disputed, but their betrayal of the cause of good government is indisputable.

Let me comment on a provision of the law which a local daily paper editorialized was unique; in fact this newspaper found it so unique as to recommend its consideration to the upcoming Constitutional Convention to be used in the election of state legislative representatives. Under this provision the two county legislative representatives from each district would be elected on a staggered basis so that every two years one representative only from each of the twenty districts would be elected. As for uniqueness, let me remind the editorial writer that the United States Constitution, which became effective in 1789, provided for the election of United States Senators on a staggered term basis. Members of Town Board, Village Boards of Trustees and Boards of Education all over Erie County and New York State are elected on a staggered term basis. The idea is as unique as day and night. The device actually is a Republican safety measure which will prevent the electorate from removing more than half the members of the new County Legislature, and not more than one from each district at any election, no matter how terribly the majority has performed. The Republicans have added this gimmick to their patent gerrymander.

Somebody has said the Republican gerrymander will, in a normal election, insure that 30 of the 40 board members will be Republican, even though the majority of Erie County voters are affiliated Democrats. I asked the County Attorney, Mr. Stiller, for the voter affiliation in each of the 20 districts, but he denied that he had this information. I challenge every defender of this redistricting plan to deny that it is gerrymandered in favor of the Republicans and heavily so. The fact of the matter is that the only figures directly used from the Special U.S. Census made in 1966 for the specific purpose of redistricting Erie County on a one man one vote basis were the totals for all of the County and undivided towns. Some two hundred thousand dollars was spent and the Republicans have disregarded the population statistics relating to every census tract and every census enumeration district. What they spent their gerrymandering time at was the Election Board statistics giving the affiliation of voters in each election district, then assembling election districts into the 20 County Districts in such fashion that a high percentage of these had a majority of Republican affiliates. They estimated the populations of the election districts so that the totals in the 20 County Districts were about equal and that they added up to the overall County population as established by the Special Census.

The devilment of these Republican schemers is evident in the hatchet act on Cheektowaga. Most of one district is in Cheektowaga to which they have attached the part of the Village of Depew that is in the Town of Lancaster. It is probable that this heavily Democratic district will elect two Cheektowaga Democrats. The balance of the town is split into three districts which are added to parts of Buffalo and Amherst, part of Amherst and part of Amherst and all of Clarence respectively. It appears that the County representatives in these three districts will come from Buffalo, Amherst or Clarence with the possible exception of one. The Republican gerrymanderers even gerrymandered against Cheektowaga Republicans.

To the detriment of all of the people living in the towns, the proposed plan unnecessarily destroys essentially all recognition of town boundaries. It is entirely possible and feasible to incorporate in a reasonable plan of redistricting the boundaries of the larger towns and by eliminating the two representatives per district, a plan of about 40 districts can be drawn which does far less violent surgery upon the boundaries of the less populated towns.

Mr. Rath you, will sign this law if your only standard of conduct in office is rank partisanship. If you have any sense of fairness, of statesmanship and good government, you will veto it.

Item No. 47

Councilman Wroblewski presented the following resolution and moved its adoption:

RESOLVED, that the attached objections to Erie County Local Law Intro. No. 6 be and the same are hereby approved and the Town Attorney is directed to file the same with the Court and cause them to be served on the interested parties to the proceeding, and if the Supreme Court should approve of said Local Law, the Town Attorney is hereby directed to serve a notice of appeal from any such order or judgment of approval, on behalf of the Town of Cheektowaga.

TO THE SUPREME COURT - ERIE COUNTY

The Town of Cheektowaga respectfully submits the following objections to Erie County Local Law Intro. No. 6 relating to redistricting:

Item No. 47 Cont'd

1. Towns are not represented as such in the proposed County Legislature.
2. Towns are not given recognition as entities in the division of the county into districts.
3. The number of districts should be increased for greater popular representation with one representative per district.
4. The number of representatives per district should be reduced from two to one.
5. The plan is based on estimates of the population of the districts - census tracts and census enumeration districts contained in the Special U. S. Census of 1966 taken in Erie County have not been directly used in the preparation of this local law.
6. The county has been inequitably gerrymandered in favor of the Republican Party with the attendant violation of the law of one man one vote.
7. The Town of Cheektowaga has been especially discriminated against in the manner in which the northern part of the Town has been districted.
8. Divorcing the County Legislature from the traditional relationship with the Towns, which the Board of Supervisors always had, constitutes an uncalled for reduction in participation of Towns in government at the county level.

The Town of Cheektowaga prays that this Court disapprove Erie County Local Law Intro. No. 6.

Respectfully submitted, on behalf
of the Town of Cheektowaga, Erie
County, New York, as authorized by its
Town Board by resolution duly adopted,
September 6, 1966, by its Attorney,
Kenneth W. Kitzinger.

Item No. 48 The Town Board took under review the Budget Estimates for Special Districts spreading costs on Benefit Basis as presented by Supervisor Weber.

WHEREAS, this Town Board has assessed the Special Districts on a benefit basis, against the lots and parcels of land, which is chargeable, and

WHEREAS, this Town Board has prepared an Assessment Roll describing each lot or parcel of land, the owner thereof, and the assessment levied against it, and

WHEREAS, this Town Board has filed such Estimates and Assessment Roll with the Town Clerk,

NOW, THEREFORE, BE IT RESOLVED, that the detailed estimates of the anticipated revenues and expenditures for every Special District and the Assessment Roll for every Special District be and the same is hereby approved, and
