RE: Town of Cheektowaga Proposal

Dear Committee Members:

Please find enclosed a letter of introduction and proposal outline of the critical areas to be reviewed in producing a management alternative study regarding assessment equality in the Town of Cheektowaga. I have attempted to incorporate those suggestions of the committee (ARC) and also incorporate expertise and background of our corporation. The outline is not finite and can be expanded or contracted once the project gets under way.

You will notice that we require a minimum of three months to complete the program and would suggest that there be monthly committee meetings for follow on work sessions with the Town Board, if desired, this to produce recommended results of the committee (ARC). We also see the potential for having direct interface by community representatives as well as having a hearing to discuss the results of our program.

In reviewing our estimated fee to produce this study, we hope that the committee and the Town Board recognizes the value of good planning in respect to management decisions. The risk exposure to the town is great in respect to moving in a direction of property assessment updates. With a complete outside program, the cost could exceed $1,000,000 and at the other end of the spectrum, underbudgeting and producing a quill patch assessment roll would represent thousands of dollars with no fair results.

We look forward to working with the committee and town officials in producing a program which will have effective results.

Very truly yours,

RE: Assessment Review Committee (ARC)/
Management Alternative Study/
Property Assessment Equality

Gentlemen:

In concert with the request of the Assessment Review Committee (ARC), We are pleased to present the enclosed proposal which addresses the issue of how the Town of Cheektowaga can prudently act on developing equitable assessment methodology.

It is well-known that in the past twenty years, the Town of Cheektowaga, not unlike all communities in Western New York, has undergone dramatic economic changes which has influenced the value of real estate. During this time, many variables (new construction, inflation, changing real estate deterioration) have produced internal changes to the underlying real estate wealth of the community and, therefore, assessment base.

We propose to address those pertinent issues which affect the Town of Cheektowaga's present and future direction regarding the development of an equitable assessment base. As you are aware, many opinions and extensive discussions have been held on this very issue, on both a local and countywide basis. It is our understanding that the Town is now at a point where a prudent management decision and, therefore direction must be taken regarding assessment matters.

Grant Appraisal & Research, a division of GAR Associates, Inc.(hereinafter known as "GAR") will undertake a management study which will enable town officials to select the direction that will meet the legal and practical needs of the community.

GAR has extensive experience in both municipal and private sectors regarding assessment matters. From the appraisal side, we have members of nationally recognized organizations that are best qualified to handle real estate appraisal and assessment tax matters (the American Institute of Real Estate Appraisers, the Society of Real Estate Appraisers and the Institute of Property Taxation). Company personnel have had better than 100 years of collective experience in dealing with property valuation and assessment matters. On a day-to-day basis, these conditions are blended into management systems and alternatives for our existing client base.

We supply consultant and maintenance advice to many local communities, have extensive experience in mass collection of property data and information regarding tax equalization programs. We have successfully defended communities in Albany in achieving proper equalization rates, have produced property valuation studies and have produced studies for munipal governments as well as private industry, this regarding tax certiorari matters.

In Upstate New York, our firm staffs more personnel than any other professional real estate appraisal firm, thus we are equipped to handle all conceivable problems. Further, we are home based in the Buffalo area.

Our proposal outline is directed toward five key areas which require study and research, this to produce quantifiable management direction. These are, but are not limited to:

1. Existing assessment base review
2. Other Western New York assessment systems
3. Erie County property valuation program
4. Program for the future
5. Solutions and course of action

Within the category "Program for the future", areas to be addressed include real property tax law and examination of the existing assessment base to be modified with an update and also complete new property valuation methods.

Further, we view the problem in Cheektowaga as requiring special attention given to community needs. We will attempt to develop short term as well as long term alterntives based on cost benefit results. In addition, we anticipate that "ARC" will have monthly review and work sessions to discuss and further enhance the management study before it becomes a final product.

With direct interface from town officials, community leaders and our consulting staff, it is hoped that an increased knowledge base of assessment problems and proper direction for the future will be developed, this to be reported in a bound, written document.

We look forward to working with the Assessment Review Committee (ARC), the Town of Cheektowaga and other public forum groups that have the same common goal; that is, to develop fair and equitable assessments which distribute the tax burden in an equitable manner.

Very truly yours,

GRANT APPRAISAL & RESEARCH CORPORATION

PROPOSAL

to the

TOWN OF CHEEKTOWAGA

To Develop Management Strategy

for

Property Assessment/Quality

PROBLEM:

The Town of Cheektowaga Officials and through the direction of the Assessment Review Committee "ARC", have resolved that present and future means of equitably distributing tax in the town is a priority concern.

The distribution of tax, this including town, county and school levies is critically aligned to the condition and distribution of assessments throughout any community. The Town of Cheektowaga, in its known history has never addressed mechanisms or systems which view the town overall in the development of modern equitable assessments. The community has undergone dramatic growth changes over the last twenty to thirty years and new real estate development, both in the residential, commercial and industrial categories, have clouded an underlying assessment issue that only recently was recognized as a problem.

Communities such as the Town of Cheektowaga, with better than 100,000 people and in excess of 30,000 tax parcels cannot from a practical point of view, maintain and develop assessment methodology without a systematic management approach which addresses both legal and practical issues in creating an equitable assessment roll for the spreading and distribution of tax.

The Town of Cheektowaga is not in an unique position in this regard, as virtually all towns in Erie County and many more in the Western New York area are faced with the same predicament. Recent changes in economic conditions in Cheektowaga and in the Western New York area over the past five years have promoted many concerns in regard to tax burdens on property owners. Inflation and later a recession has caused property owners to look carefully at their individual tax burdens. In the past, during the boom of the late forties and fifties, many of the underlying assessment problems were clouded. Growth has a tendency to create increased assessment bases which allow for a dilution of increased budgets to run schools, government and provide local services. The Town of Cheektowaga is currently in the position of realizing a shrinking assessment base and, therefore the need is promoted for equitable assessments.

PURPOSE

The New York State Legislature recognized this problem as far back as ten years ago and old legislation was updated and more recently, new legislation has changed the legal criteria in how communities must develop assessment practices. Thus, the problem to be resolved by the management alternative study is to view existing conditions in both Cheektowaga and other local communities, address the progress Erie County has made in an attempt to resolve many of the same problems, and then look to a program for the future to the Town of Cheektowaga,

this surrounding legal and statutory requirements creating assessment bases and also the potential of blending in-house and out-of-house programs to develop the goal of equitable property assessments. Thus, this will be the purpose of the study, to give town officials a means by which prudent management direction can evolve regarding the future of spreading the tax burden in the Town of Cheektowaa.

OUTLINE AND REVIEW OF STUDY

Set forth below are five major categories which will be addressed by GAR in producing study results. Interview, field research and the collection of quantifiable data will be developed to the highest extent possible so that the town can be in a position to make both a financial and practical decision regarding assessment and tax practices in the town.

The outline is not to be construed as finite and through the course of the project it is expected that work sessions with ARC will develop other concerns not presently known. To the extent that man resources are available within GAR budgets, these will be explored without hesitation.

It is believed that through the blending of municipal and public input, correlated by GAR's independent expertise, the best workable product will be produced.

I - Existing Assessment Base

Many areas of concern regarding where the town will go in the future revolves around the history and origin of the town's assessment base. Some of the areas to be explored are below:

- history and origin of community and development of assessment base
- methods and systems/formulate determination of assessments
- equality of program
- availability of in-house resources to maintain system
- current tax administration system (ARLM)
- outlook

II - Other Local Community Systems

- Current and future problems
- Formulas and systems currently invoked
- Management programs to resolve problems
- Local citizen reaction to systems and existing programs

III County Property Revaluation Program

The County of Erie has been underway with a countywide valuation program which involves the collection of physical data and the development of market values which can be utilized by all local communities. The program has been initiated, delayed and restarted a number of times over the last seven years. The condition of this program and its future in regard to a favorable impact on the Town of Cheektowaga is a significant part of the study review. The program must be reviewed from the point of view of existing taxpayer cost and how this expenditure can be best utilized by the town and what information and data base can be helpful in creating a fair assessment system in Cheektowaga. Some of the areas to be reviewed are:

- history
- cost to date
- commitments to support local communities
- county responsibilities
- program and influence on local community decisions on producing their own systems
- deliverable products and review of data base
- future of program

IV - Program for future - Town of Cheektowaga

The town's future will be directly tied to the present and future availability of resources and funds to complete an equitable program that will comply with New York State law and yet develop practical results for the purpose of spreading tax levies. Some of the areas to be addressed are set forth below:

(The outline will be expanded based on need.)

A. New York State legal requirements - Real Property Tax Law has specific guidelines for determining assessments in New York State. A program for the future must address these legal issues so that compliance will be in place.

B. Explore existing assessment base with potential modifications. GAR will attempt to review problems and good points of maintaining the existing assessment base but modifying assessments by property class and geographics in an attempt to updating in an equitable fashion.

C. New property valuation methods

1. In-house program

- review resources
- review costs
- review timing
- analyze quality output

2. Out-of-house program
   - cost of program
   - control and direction by community
   - quantitative review of results
   - qualitative review of results
   - timing
3. Outside program produced by Erie County with town interface
   - compatability of government groups producing acceptable results
   - cost
   - timing
   - hybrid development utilizing existing town staff, consultants and county officials
   - effective results of having county support

V - Summary and Solution of Management Direction

A composite of results of reviewing the foregoing major categories will produce management alternative direction. GAR, as a consultant firm, cannot make the decision for the community which would best produce a program satisfactory to the people as well as government officials. However, cost alternatives and the potential for having various degrees of quality results can be accomplished and, in the course of this program, an initial management plan will be in place. The overall plan will address short term versus long term objectives, discuss the risks of moving ahead in systems of uncharted territory and will produce dollar cost options for different direction.

The summary of the program will also outline benefits of different management direction.

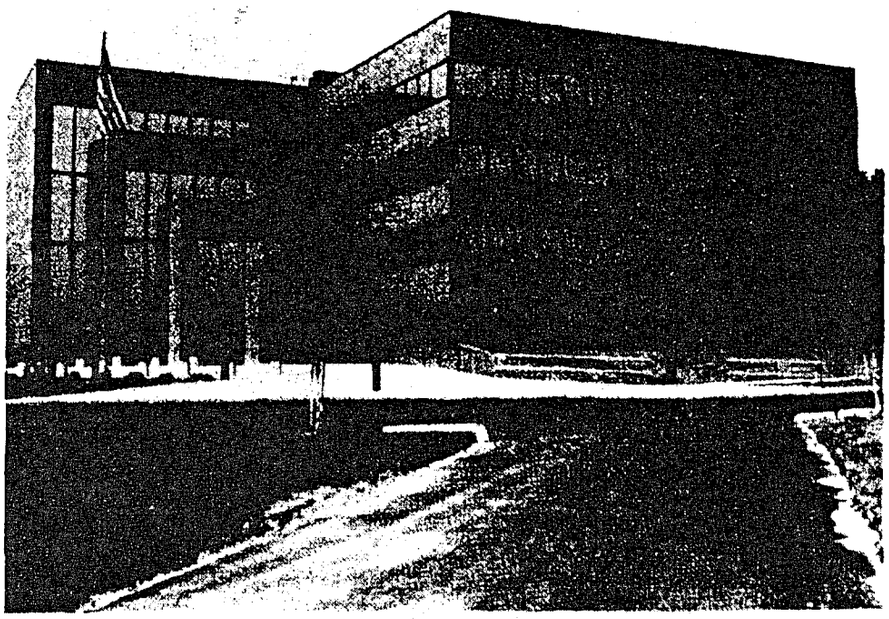

TIMING AND COST OF STUDY

GAR expects to submit the final report to the Cheektowaga Town Board within three months' time.

Our proposal to conduct the management study is $55.00 per hour, not to exceed 90 man hours, for a total cost of not more than $4,950.00.

The cost of producing the study which will review alternatives is viewed as minor in respect to the risk of moving in directions entailing cost of great magnitude.

*Where mathematical errors were made by Bidder

The bids were reviewed by Nussbaumer & Clarke, Inc. and arithmetical corrections were made on two (2) of the bids as noted above. It is recommended that the bid be awarded to Castricone Contractors, Inc., 105 Wagner Street, Sloan, New York 14212 for their bid price of $268,056.00 which is the lowest bid meeting the requirements of the specifications. The Engineer's Estimate for this job is $295,000.00.

Since this is to late for any concrete or asphalt work, we are not allowing the contractor to start work until early spring of 1984. This will prevent any disruption through the winter period for those persons living in the project area.

Very truly yours,

TOWN OF CHEEKTOWAGA

PROCEDURE

The parties being unable to negotiate a collective bargaining agreement (cba) to succeed one expiring on December 31, 1982* (JE1), the Union pursuant to Article XIV CSL Section 209.4 petitioned

*..."or until such time as a subsequent agreement becomes effective." JE1 Section 24.03

PERB on March 23, 1983 for interest arbitration of the matters remaining in dispute. The arbitration panel was designated on April 28, 1983 to hear and decide the issues in dispute. A hearing was held in Cheektowaga New York on June 16, 1983 at which time the parties produced evidence* including the testimony of sworn witnesses, and made argument in support of their respective contentions. Written briefs were received by July 28, 1983 at which time the record was completed and the Panel commenced its deliberations.

In arriving at the following determinations which the Panel believes are ..."just and reasonable"...[CSL Art. XIV, Sect. 209.4 (v)], it has applied the following statutory criteria:

> (v) the public arbitration panel shall make a just and reasonable determination of the matters in dispute. In arriving at such determination, the panel shall specify the basis for its findings, taking into consideration, in addition to any other relevant factors, the following:
>
> > a. comparison of the wages, hours and conditions of employment of the employees involved in the arbitration proceeding with the wages, hours, and conditions of employment of other employees generally in public and private employment in comparable communities.

DISCUSSION

The Public Arbitration Panel's findings of fact and analysis result from a review of the evidence and arguments offered at the hearing and of the briefs filed by the parties. The Panel's review occurred privately by the members at three meetings held on August 30, September 30 and October 2, 1983 and on correspondence exchanged between the Panel members. The final meeting of the Panel produced a unanimous vote on all issues.

Both parties adduced arguments based on comparability. However, the comparison bases differed. The Union principally offered police departments near to or contiguous with Cheektowaga. The Town compared to departments scattered throughout Western New York (see footnote page 2 supra)*. Since the Panel is obligated pursuant to Section 209,4,(c) (v), a. (supra) to make comparisons between different work forces the appropriate weight to be attached to these different comparison bases is significant. Clearly the more remote from Cheektowaga the individual police department, both in terms of location as well as the nature of the department itself (i.e. city, urban, suburban) the less validity it has for comparison. Of the departments offered, the larger suburban departments located geographically near to Cheektowaga appear to be most relevant. Factors such as the size of the force, calls per day, area and population suggest that police forces in Tonawanda (Town)

---

*The Club in UE 8 and 10 provided statewide averages for negotiated and arbitrated awards.

Amherst, West Seneca, and North Tonawanda are most comparable with Cheektowaga (TE1 (4), UE1, which are attached to and made a part of this Opinion and Award). Each unit provides service to a population of more than 35,000 persons located in urban or suburban settings, and each has a police force in excess of fifty uniformed employees. Of this sample Amherst and the Town of Tonawanda bracket Cheektowaga on the basis of population served and size of the uniformed police force.

Less significant for purposes of comparison are the City of Buffalo because of factors which are unique to a large city and police forces in smaller cities or towns located at some distance from Cheektowaga though still in Western New York (i.e. City of Jamestown, Town of Hamburg).

The size of the Cheektowaga police force and the nature and size of the population it serves, makes comparison with the four geographically proximate police forces described above pertinent. Because of these similarities there is created a greater probability that the "conditions of employment" of police officers in the Cheektowaga Police Department are similar to the "conditions of employment" of officers in these other departments. It is likely therefore and the evidence (TE1 and UE1) indicates that Cheektowaga Police Officers "perform similar services...requiring similar skills [and work] under similar...conditions...with other employees [in these] comparable communities." (supra)*

* See stipulation regarding the discharge of similar duties between police officers in Cheektowaga, Amherst, West Seneca and Tonawanda (supra).

The Union offered exhibits (UE 8 and 10 which are appended and made a part of this Opinion and Award) depicting average statewide negotiated and arbitrated wage settlements for police bargaining units. The settlement figures reported on these exhibits are pertinent to this arbitration because they represent statewide averages thereby accounting for certain exceptions that might emerge from a smaller sample.

The weight to be attached to the figures reflected in these exhibits (for comparison with Cheektowaga) must be measured against the economic climate prevailing throughout the state as opposed to economic conditions extant in Cheektowaga. In addition, other issues being considered by this Panel and not addressed in UEs 8 and 10 have economic impact and any wage award must be measured against the Panel's determination on the other economic issues.

Colorably all fourteen open issues have economic implications; however, ten of the open issues indisputably have economic impact (1-4, 8-10, 12-14). For this reason, the statutory requirement (Section 209,4, (c), (v), b) regarding the employer's ability to pay and the interests and welfare of the public are apposite.

Salary:

The Town cited relatively low inflation in 1982, rising unemployment*

* Unemployment in the Buffalo Market has risen from 10.5% in 1981 to 13% in 1982 (TEp14).

and relatively low wage settlements in the private sector as factors favoring a modest economic package here. Specifically the Town contends that its offer of 4% salary increases in each of two years* recognizes the current "economic realities". Further, the Town compares its present offer with wage increases negotiated for police in Cheektowaga in 1981 and 1982 and concludes that over the four year period (1981-1984) its present offer would easily outdistance increases in the Consumer Price Index (CPI). In evaluating its offer the Town observes that the economic climate in Cheektowaga poses financial hardship on numerous business and industrial facilities which form an important part of the Town's tax base. Because of this hardship a number of firms have recently applied for and been granted reductions in their property assessments. Over 200 similar applications for reduced assessments are now pending (TBp14). Since little growth has occurred in Cheektowaga the reduced assessments previously granted and the possibility that some of the applications for reduced assessments now pending will be accepted creates a particularly bleak future for taxpayers in Cheektowaga. Since the police budget comprises 33% (TBp15) of the Town budget the economic deliberations present in this arbitration are particularly significant and the Town's financial status must be given serious consideration.

In arriving at an award on the matter of salary a balance must be established between the Town's relatively limited ability to pay,

---

* Fourth year P/O 1983 = $23,259.00, 1984 = $24,189.00 (TE 1 (1) appended hereto and made a part of this opinion and award).

and a reasonable salary adjustment measured principally against the four primary police forces identified above. Cheektowaga police officers in 1982 received salaries approximately mid-way between these four police forces (see Town's Post Arbitration Brief Exhibit 1* appended hereto and made a part of this opinion and award). Statewide arbitrated police settlements effective in 1983 rose 7.67% (UE10).

A Department-wide salary increase of 5.5%** would raise the salary of fourth year patrolmen to $23,595. This increase would place Cheektowaga officers in a virtually identical salary position with officers in Tonawanda (TE1 (1), above those in West Seneca and North Tonawanda, but behind those in Amherst. Such an adjustment is reasonable and in combination with the economic determinations to follow, meets the statutory obligations set forth above.

There being no serious dispute regarding the length of the proposed cba and both parties taking positions favoring a two year cba the panel finds for a ywo year cba and therefore is required to make a second year salary recommendation.

The data available for wage settlements in 1984 for the principal comparison base (of the four other districts) indicates that a

---

* The data on salaries offered in UE1 and TE(1) is difficult to compare since the figures represent show up time for officers in the Amherst Police Department, and otherwise compare 1983 salaries with Cheektowaga's 1982 salaries. (the Town challenges the accuracy of the Club's figures for the Town of Tonawanda).

** Retroactive to January 1, 1983

7.5% improvement in Cheektowaga would show a modest improvement in the ranking of salaries paid in Cheektowaga. Such an increase would bring fourth year patrolmen to $25,365.00. This level is virtually identical with wages to be paid in 1984 to officers in Amherst and Tonawanda* and as was true in 1983, maintains a higher wage in Cheektowaga than that paid in West Seneca and North Tonawanda. While this second year determination is greater than that found for the first year, it more precisely matches the relative gains made statewide for police officers in wage settlements negotiated in 1983. By backloading the salary issue the Town is granted some relief within which to address its pressing economic situation. The two year salary adjustment at 5.5% and 7.5% therefore accommodates to the statutory requirement regarding comparability as well as the requirement concerning the ability of the employer to pay and the interests of the public. The recommendation also takes into account recent settlements between the parties. Finally the salary finding being based on a comparison with other police departments the statutory duty to compare the conditions of employment of the members of this bargaining unit with employees similarly situated has also been met.

Uniforms:

In the principal comparison base officers working in Amherst, the Town of Tonawanda and the City of North Tonawanda are supplied

---

* See Town's challenge to UE1 regarding salary figures in Tonawanda (supra).

with uniforms at no cost (UE2 appended and made a part of this opinion and award, and UBp5). Only officers in West Seneca and Cheektowaga must buy their equipment. Therefore sums paid for uniforms in the former three departments are more in the nature of maintenance allowances. Since the Uniform allowance paid in West Seneca is $230.00 higher than that paid in Cheektowaga ($600 vs. $370) and since the other departments supply uniforms it is apparent that an improved uniform allowance is justified in Cheektowaga. In finding that the allowance should rise to $400 effective in the second year of the cba, the panel is mindful of the difficult fiscal restrictions currently facing the Town. Since the uniform allowance represents a cash outlay it might be viewed as a salary supplement. As will be shown the Panel is mindful of the impact of this finding on all other economic determinations.

Rate of Pay:

Presently the hourly rate of pay of unit members is derived by dividing the annual salary by 2080. The Union proposes to arrive at the hourly rate by dividing the number of days worked annually into the hourly rate and then dividing that number by 8. The Union failed to prove why the change sought was necessary, nor did it adduce statistics from comparable bargaining units to show that its demand has been adopted elsewhere. Therefore the present system for calculating the rate of pay shall remain unchanged.

Longevity:

Of the figures produced, Cheektowaga is the only department which requires that employees wait until their sixth year of service in order to be eligible for a longevity payment. The other three departments* begin payment at five years and at a level at least $125 above that paid in the sixth year in Cheektowaga (UE6 appended hereto and made a part of this opinion and award). Since these payments, once having begun, continue for the balance of the officer's employment (and are improved at successive steps) a modest first step payment continues to be reflected in additional longevity payments. The cumulative effect of those payments over a career of 20 years can be considerable.

Since the basis on which retirement pay is calculated reflects both the cumulative effect of longevity payments begun in the early years of an officer's employment as well as salary improvements granted in his final three years, the final longevity step payments assume considerable significance. At present Cheektowaga police officers receive three longevity payments with the final payment commencing in the officer's 18th year of service (JE1). The principal comparison base shows that two of the other departments pay five longevity increases with the final payment at 20 years of service and the third department pays six steps with the final payment at 25 years of service. UE6 reveals that the size

---

* The first longevity step in North Tonawanda was not in evidence.

of longevity payments between the comparison base are approximately equal with the net result that Cheektowaga officers must wait longer periods between longevity steps increases and are at an initial disadvantage because of the modest size of the first payment and the fact that it is delayed until the sixth year of service. Clearly improvements at both ends of the longevity scale are warranted. Therefore, in the first year of the cba the first longevity payment shall be increased to $275.00 In the second year of the cba the first longevity step shall be paid at five years of service (instead of six) and shall be raised to $300.00. In addition, on July 1, 1983 the final longevity step shall commence being paid at the 17th year of service. On July 1, 1984 the final longevity step shall commence being paid at the 16th year of service.

Work Day Work Week:

Presently Cheektowaga police officers work a 6-2, 6-2, 6-3 work schedule. The union claims that a 4-2 work schedule is commonplace in nearby communities and is preferred because through rotation this schedule allows a greater number of weekend days off. The Union seeks a new schedule of 5-2, 5-3 within a fifteen week rotation. Since the proposal would reduce the actual time worked, the Union proposes tacking fifteen minutes of "unpaid" time to the beginning of each shift for briefing purposes. The Town's principal objection to a change in the work-day work-week schedule rests on the cost of the proposal. The Town estimates

that the Union demand would provide officers with an additional 26 days off per year and cost in excess of $200,000.

The Panel recognizes the importance of a change in the work schedule but realizes that many competing interests must be balanced before changes in the present system should be made. Arguments offered in favor of pre-shift briefing time were persuasive, yet the Panel recognizes that cost considerations arising from the potential to hire extra police officers if the new schedule were to take place must be weighed against any additional service that might be derived. The Panel does not feel that it has been given enough information on which to make a change in the work-day work-week schedule and believes that the parties could benefit by additional study of the alternatives. Therefore the Panel makes the following determination of the work-day work-week proposal.

> "The PBA is desirous of revising the present work day, work week scheduling in order to provide more efficient public service. Such change will require study and mutual agreement.
>
> Following the execution of this Agreement, the Chief of Police and the President of the PBA may meet at the request of the PBA and discuss changes in the present work week, work day schedule.
>
> If the Chief and the President reach agreement as to scheduling of the work day, work week this agreement will be communicated to the Town and the PBA.
>
> It is understood that there is no obligation upon either party to meet and confer under the provisions of this clause; nor to reach agreement regarding the subject of the clause. This clause has no binding effect upon the Town of Cheektowaga nor creates an obligation to discuss any changes under the provisions of this section."

Interrupted Lunch Hour:

Special Lunch Hour Leave:

The Town's demand that these provisions be deleted from the cba was not supported with argument in its brief. No evidence was adduced in the hearing supporting the Town's position. Accordingly the Panel having no basis on which to hold that a change in the current practice is warranted finds that these provisions shall continue without change into the ensuing cba.

Court Pay:

The Town proposes that where an officer makes two court appearances on a single day without regard to the location of the court, he shall be paid for the time actually spent or four hours whichever is greater. The Town contends that the present system allowing four hours pay for each appearance may allow an officer to make two appearances within a four hour period but claim pay for eight hours. Through exhibits (TE 6 and 7) the Town has attempted to show how the court time payment account has become increasingly burdened because of this practice. The Union observes that the issue was the subject of a recent arbitration (in which a decision was rendered allowing for a different payment schedule depending on the court appearance being within or without the Town) which sufficiently clarified the practice so that no further changes are warranted at this time. The Panel agrees. Unlike other payments in kind, pay for court appearances are calculated at a higher

level than the officers' standard hourly rate because the appearance is of an onerous nature, occurring during normal time-off periods. While the Panel acknowledges the increased costs illustrated by the Town's exhibits it was unable to determine the savings which might accrue if the Town's proposal were implemented. Since the matter has so recently been clarified through grievance arbitration, and since the actual economies to be realized have not been fully developed or proven the Panel concludes that no change is warranted at this time.

Holidays:

The Union's request for a lump sum payment from the Town for holiday time worked did not produce strong exception from the Town whose major objection to the Holiday proposal was reserved for the Union's request for time and one-half for holidays actually worked. The Union observes that with the exception of police officers, other employees who work on holidays receive payment at the levels sought. The Town stated that Cheektowaga police officers presently have fourteen holidays per year, a number above that available to officers in any other Western New York police department.

The evidence does not support the Union's demand. Far more evidence than that offered would be necessary for the Panel to find in favor of a practice of paying time and one half for holiday time worked when this practice is completely alien to any other police

force cited by either party. While other municipal employees may enjoy this benefit the Panel is statutorily required to place greatest weight on the experience of other police departments. Since they don't have the sought for benefit, it shall not be recommended here.

The Panel does find in favor of the payment in a lump sum no later than the third week of October for officers who elect holiday pay in lieu of time off.

Vacations:

The Union's principal argument in support of increasing the number of vacation days rests on its contention that since Cheektowaga officers work a 6-2, 6-2, 6-3 work week, at the end of ten years service their vacation entitlement is only three and one half weeks as compared to four weeks "in all surrounding communities." (UBp23). After 15 years service the time available for vacation in Cheektowaga is 4 weeks and 1 day as opposed to "a full 5 weeks ["in all other surrounding communities"]" (UBp24). The Town contends that the time available for vacations is adequate when compared with surrounding communities. By comparing Cheektowaga's vacation entitlement to other entitlements (TE1(2)) it can be seen that based strictly on days available, Cheektowaga is at least comparable with all other communities and is considerably ahead of some.

The Panel is unwilling to apply the logic of the Union. Customarily the measure of time off is made on the basis of the days actually available for vacation. To conclude that Cheektowaga is deficient in its vacation entitlement as the Union contends requires that the time worked, not the time not worked (which is the essence of vacation entitlements) be given consideration. If the Panel were to engage in the kind of logic espoused by the Union then consistency would require that it also evaluate each of the other terms of employment in order to ascertain the relative value of vacation. This the Panel is unwilling to do. The most persuasive evidence therefore is that offered by the Town. That evidence indicates that vacation entitlements in Cheektowaga are adequate and therefore no change in the amount of vacation time is made.

The Union also requests a change in the method of calculating the number of employees who may be absent for vacation at any given time. The Town opposes this proposal because it believes that manning requirements would not be adequately met were the ratios changed. Since the issue relates both to the ability of the employer to discharge its mission and the conferral of an additional benefit to the Union, the Panel would require a substantial quantity of evidence before making the change sought by the Union. That sufficiency of evidence was not produced and therefore no change is recommended in the manner by which the number of employees on vacation at a single time is to be calculated.

Personal Leave:

Presently unused personal leave is added to an officer's sick leave accruals. The Union requests that police officers be given a choice of adding their unused personal leave to their sick leave or their vacation accruals. The Town is willing to grant the Union's proposal but insists that a clause be added that would bar the denial of personal leave from the cba's grievance mechanism.

The Panel is unwilling to grant the Town's request. At present the cba gives the Chief the right to refuse requests for personal leave if the leave would "seriously hamper or impede the operation of the police department." (JT1p15). No evidence was proffered to show why that language should not be subject to the grievance machinery either because of a history of difficulty administering the provision or because of anticipated problems. The fact that the personal leave provisions are generous in terms of the amount of time available is unrelated to the Town's position that the refusal to grant the time not be subject to the grievance process.

Therefore the Panel grants the Union's request that officers be given an option on an annual basis to designate their vacation or sick leave accruals to receive their unused personal leave. The Panel rejects the Town's request that the Chief's refusal to grant personal leave be barred from the grievance provisions.

Sick Leave upon Termination:

The Union requests that the value of accumulated sick leave be doubled from the present provision in the first year of the cba and trebeled in the second year, arguing that the sought after enhancement will discourage the specious use of sick leave. Of the departments in the comparison base, West Seneca's conversion system is closest to that followed in Cheektowaga. There the conversion base is 50%. The Town opposes any changes.

The Panel does not recommend that any changes occur. In decisions above the Panel has held in favor of improving the longevity payments. These changes will enhance the final average salary for officers thereby elevating the retirement pay levels. In light of the relatively limited evidence favoring an improvement in sick leave conversion upon retirement and since the Panel has already made improvements which impact upon retirement benefits, further improvement here is not warranted.

Health Insurance:

The expired cba (JE1) states that the employer "will provide at its own expense, Blue Cross and Blue Shield Insurance at least equivalent to the 50-51 Plan, together with the $250,000 Major Medical with $50 deductible and $1.00 co-pay prescription rider." (p.20) The 50-51 Plan was abandoned by the carrier but provided for a variety of health related coverages under the basic premium.

The 80-81 Plan substituted for the 50-51 Plan exempts a number of items formerly included in the basic 50-51 Plan and requires that insureds seeking a continuation of those benefits purchase riders at costs beyond that charged for the basic 80-81 coverage. The Union contends that with the exception of Option two for Vision Care Benefits the balance of the Riders sought in its proposal are simply to substitute for coverage previously available under the basic 50-51 Plan.

The Town, while admitting that the shift from the 50-51 Plan to the 80-81 Plan makes comparisons difficult, nevertheless compiled a chart (TE(6) appended hereto and made a part of this exhibit) which purports to show that Cheektowaga police officers enjoy a "very lucrative medical package." (TBp12)

The Panel shares the Town's confusion over the difficulties entailed in making realistic health insurance comparisons. In addition to the carrier's change in the basic coverage, TE1(6) confuses the issue further by comparing 1982 coverages and 1983 coverages for some but not all departments. Neither party offered evidence showing the basic insurance costs of the bandoned 50-51 Plan with costs for the substituted 80-81 Plan. The Panel makes official notice of the fact that there is a reduced premium for the 80-81 Plan. The Union offered (U7) a break down of the costs of the Riders available under the 80-81 Plan, and it was upon these costs that the Panel was ultimately able to reach a consensus as to the riders to be provided. By its holding, which delays

until the second year of the cba the implementation of the Riders, the Panel continues to acknowledge the Town's current fiscal straits. Therefore commencing in the second year of the cba the Town at its expense shall provide the following riders:

BC Basic Rider 8 (dept. to age 23)
BS Basic Rider 8 (depts to age 23)
Maj Med Rider 8 ($100 deduct)
Prescript. Drug Rider 8 (Dep to age 23)
Option Two Vision Care
BS Basic Rider 4 (Emerg Acc etc)
BS Basic Rider 3 (In Pat visits to 365)
BS Basic Rider 12

The Town did not seriously resist the Union's request that a provision be attached to the health insurance contract (with the carrier) providing for the continuation of family plan coverage following the death of an officer for the balance of the year in which the death occurred. The issue took on a degree of urgency recently following the immediate cessation of coverage for the family of a deceased officer in a near-by community. In light of the considerations favoring the provision and since there is relatively slight opposition the Panel finds in favor of the change.

Club Representatives:

Commencing in 1970 the process of negotiations gradually restricted the number of officers who could "attend to the affairs of the Club [or who could] attend meetings [of police officer's organizations]" (UBp31). At present the Union is allowed a maximum of seven members to attend to the union's affairs and

seven members (excluding the President) who may attend meetings of police organizations, (in either case) without loss of pay (JE1p21). The Town proposes to limit to five the number of officers who can attend to the Union's affairs and limit to three the number who can attend meetings of Police organizations. The Town also proposes to tighten the conditions under which requested time off will be granted and to prohibit officers from taking leave for attendance at ..."social functions, such as installations, dinners, clam bakes, PBA dinners, etc." (TBp12).

Neither party produced evidence regarding the released time practice in other departments and therefore the Panel is left with only opposing argument for the changes sought. There being no convincing reason to make the reductions sought by the Town, the Panel denies the request and finds that the language in the expired cba shall continue without change regarding the number of persons who may be excused from duty or the description of the reasons for which the excused time may be taken.

The Union's proposal to allow the President's shift to be changed to the day trick finds favor with the Panel. The cba gives the President time off to attend to the affairs of the Union. Since the greatest compliment of bargaining unit members are assigned to the day shift, and since it is reasonable to assume that of the three shifts the day shift generates the greatest volume of activity, an economy of time is achieved by the President working the day shift. Additionally the ready availability of the

President is likely to enhance the smooth administration of the cba by assuring that problems will receive immediate attention. Where it is necessary to shift the President to the day shift (and then cover his former shift with another officer) in order to comply with this holding a minor inconvenience is visited upon the Town. The benefits to be gained however, being greater than the burden, the proposal is adopted by the Panel.

There being no other unresolved issues, the Panel incorporates into the Award to follow all holdings set forth above as well as all matters on which the parties reached agreement prior to petitioning for binding arbitration. Matters not addressed in this award or agreed to by the parties are determined to have been dropped and shall not become a part of the two year cba found here.

TO THE SUPERVISOR AND
HONORABLE TOWN BOARD MEMBERS
TOWN OF CHEEKTOWAGA

RE: Cedargrove Heights Project
Professional Services

Gentlemen:

Bid proposals were solicited for the furnishing of professional services for construction survey and services during construction for our Cedargrove Heights Stage II, Phase IV construction project, Six (6) proposals were received as follows:

Pratt & Huth Associates	$6,754.00
Nussbaumer & Clarke, Inc.	$11,200.00
Edwards & Moncreiff, P.C.	$12,500.00
Krehbiel Associates, Inc.	$19,655.00
URS Company, Inc.	$23,500.00
Corddry, Carpenter, Dietz & Zack	$30,000.00

We have discussed the proposal submission with Pratt & Huth Associates whose proposal is much less than we would anticipate for these kind of services. They have agreed to do the work for that price. We are, therefore, recommending that the award for professional services be made to Pratt & Huth Associates for their submission.

Very truly yours,

- Material normally inserted in Newspapers by the publishers is acceptable (e.g. Sunday supplements and advertising)
- Magazines, phonebooks, other bound books and directories are not considered to be Newspapers and should be discouraged.
- Corrugated or chipboard boxes, office papers, stacks of grocery bags, etc. except as used in packaging the Newspapers should be discouraged.

However, each instance of delivery would be considered a separate sale beyond the terms of this Agreement and would be purchased based on quantity, quality and current market conditions.

2. Packaging

- Newspaper should be bundled in stacks of eight inches to eighteen inches to facilitate handling by both the Seller and the Buyer.
- Newspaper should be tied securely with string or rope, or neatly stacked in kraft grocery bags or corrugated boxes.
- Plastic bags, plastic ties or strapping, or gummed tapes should be discouraged.

It is the intention of these guidelines to facilitate the collection and delivery efforts of the Seller as well as the operations of the Buyer.

TO THE SUPERVISOR AND
HONORABLE TOWN BOARD MEMBERS
TOWN OF CHEEKTOWAGA

RE: Leasing Storage Space
Award of Bid

Gentlemen:

At the regular Town Board Meeting on December 5, 1983, bids were received and opened for leasing of storage space for the Highway Department and for election machines. Two (2) bids were received as follows:

	Item I (Highway Use)	Item II (Election Machines)
Borden Losson Corp.	$3.50 per sq. ft.	$3.50 per sq. ft. *
Stephen Korduba		$3.55 per sq. ft.

*Bid Rejected

The facilities were inspected by the Engineering Department, together with Mr. Alfred Wnek, Highway Superintendent, and Mr. Richard Moleski, Town Clerk.

The Borden Losson Corporation storage facility is presently being used by the Highway Department. Mr. Wnek is very satisfied with this area, being able to attach highway plows indoors giving him a faster response time to snow emergencies and also allowing trucks to turn around within the facility. This is the only bid submitted for Highway Storage.

The Borden Losson Corporation does not have a sprinkler system, therefore, the bid for election machine storage is rejected for not meeting the requirements of the specifications. The Korduba location is presently used for election machine storage and meets all the requirements of the specification. This location offers Mr. Moleski greater security for his equipment.

In conclusion, it is recommended to this Town Board that the bid be awarded to Borden Losson Corporation, 812 Borden Road, Cheektowaga, New York 14227 for highway equipment storage of 13,950 square feet at $3.50 per square foot. It is further recommended that the bid be awarded to Stephen Korduba, 3926 Broadway, Cheektowaga, New York 14227 for election machine storage of 5,185 square feet at $3.55 per square foot.

Very truly yours,

PROGRAM APPLICATION

1983

1. PROBLEM IDENTIFICATION AND ANALYSIS

The Cheektowaga Police Department is aware of numerous drivers who operate their vehicles even after consuming alcoholic beverages to the point where their reflexes and time reaction has been impaired. Alcohol was one of the major factors of the 1,522 reported accidents occuring in the Town of Cheektowaga during 1982.

Some Officers are reluctant to make D.W.I. arrests because such arrests are time consuming, involve many court appearances, dissatisfaction with court dispositions and in some cases need additional training in D.W.I. arrest procedures, equipment and testifying.

2. PROGRAM GOALS AND OBJECTIVES

Although our department has arrested 625 persons for D.W.I. in 1982, this is only a small percentage of the violators on our public highways. In an effort to reduce D.W.I. violations, there are several avenues of approach: Education, Public Awareness, and Apprehension of Violators. The approach that will have the largest impact and give the most immediate results is the apprehension of violators. We intend to increase our D.W.I. arrests by 10% and our D.W.I. conviction rate by 10%.

This department does have quantitative terms to describe project objectives, and sets them forth below because it is a requirement of this application. However, it is felt that such terms are not truly indicative of the manner in which we propose to operate and the funding we seek. What we intend to do is assign a combination of manpower from current duty assignments to specifically concentrate on the identification of and apprehension of intoxicated drivers. The degree of improvement in our performance is directly related to the intensity of assignments, which in turn is directly related to the percentage of funding from convictions that is returned to the department making that conviction possible. See section following.

(716) 686-3500

3. PROGRAM DESCRIPTION

We have a up-to-date records system which keeps us informed as to where our accidents are occuring and when. It also tells us when and where our D.W.I. arrests are occuring and who is making the arrest. From this information we have decided to assign a one man patrol vehicle each evening, seven days a week, from 10PM (2200 hours) until midnight (2400 hours) and midnight (2400 hours) until 3AM (0300 hours) to apprehend intoxicated drivers. Their supervisor will be instructed to see that these officers do not take any other calls or details but concentrate completely on D.W.I. enforcement. This will be in addition to the normal enforcement that already has been in force. For rotation purposes we will train and update the training of eight men in enforcement and court procedures. Each man receiving 56 training hours. A new closed circuit video recording system will be purchased to reinforce our D.W.I. court cases. There will also be the expense of additional ampoules for the breathalizer and Alcosensor. The location of operation of this D.W.I. program will vary as our records of accidents and D.W.I. arrest indicate where the need is.

The specific degree to which manpower is assigned depends upon this department being able to cover the costs of such concentrated D.W.I. attack with receipt of the funds for which this proposal is being made. We have determined that we need sixty-five percent of the funds coming into Erie County, distributed to each police agency participating in direct proportion to the number of convictions under the program obtained. All funds so received will be applied to a sustained D.W.I. enforcement program.

Dear Mr. Rosenblatt:

Pursuant to our telephone conversation of February 15, 1984, enclosed herein please find a copy of a letter dated March 28, 1980 from the New York State Workers' Compensation Board stating that the Town of Cheektowaga has been accepted as a self-insured employer under the Workers' Compensation Law. Also enclosed herein is a copy of a "Notice of Compliance" with the Workers' Compensation Law, which verifies that the Town is still in compliance with the Workers' Compensation Law.

Please be advised that the Town of Cheektowaga is still an approved self-insurer for Workers' Compensation Insurance and will continue to be such indefinitely unless cancelled for some reason; in the event the Town ceases to be an approved self-insurer, the County of Erie will be notified.

6. You are entitled to be treated by a doctor of your choice, if he is authorized by the Chairman, Workers' Compensation Board.
